Security recommendations [1] ⟳

⚠️ **Add MFA for root user**   **Add MFA**
Add MFA for root user - Enable multi-factor authentication (MFA) for the root user to improve security for this account.

✅ **Root user has no active access keys**
Using access keys attached to an IAM user instead of the root user improves security.

What's new ⧉
Updates for features in IAM   **View all** ⧉

- IAM Access Analyzer findings now support Amazon SNS topics and five other AWS resource types to help you identify public and cross-account access. 1 week ago
- IAM Access Analyzer now reviews your AWS CloudTrail history to identify actions used across 140 AWS services and generates fine-grained policies. 4 weeks ago
- IAM Access Analyzer makes it easier to author and validate role trust policies. 4 weeks ago
- AWS Lambda announces support for a new IAM condition key, lambda:SourceFunctionArn. 3 months ago

Add user

① ② ③ ④ ⑤

Set user details

You can add multiple users at once with the same access type and permissions. Learn more

User name* abi

➕ **Add another user**

Select AWS access type

Select how these users will primarily access AWS. If you choose only programmatic access, it does NOT prevent users from accessing the console using an assumed role. Access keys and autogenerated passwords are provided in the last step. Learn more

Select AWS credential type* ☐ **Access key - Programmatic access**
Enables an **access key ID** and **secret access key** for the AWS API, CLI, SDK, and other development tools.

☑ **Password - AWS Management Console access**
Enables a **password** that allows users to sign-in to the AWS Management Console.

Console password* ○ Autogenerated password
● Custom password

••••••••••••

☐ Show password

Require password reset ☐ User must create a new password at next sign-in
Users automatically get the IAMUserChangePassword policy to allow them to change their own password.
